ABOUT ME

I'm Leon Sovič, a full-time student studying Computer Science and Information Technologies at FERI. I've been programming since high school.

I have some personal and university projects listed on my GitHub profile.

My expertise lies in programming languages such as C, C++, JavaScript, React, Node.js, Express.js, PHP, Python(scripting and OpenCV), and scripting with Bash. Additionally, I have experience working with relational databases, specifically in SQL, as well as NoSQL databases like MongoDB. I also possess a solid understanding of computer networks, web development, a good grasp of Linux systems and basic computer vision knowledge.

Apart from my technical skills, I am fluent in English and have a good understanding of German, although I haven't been actively using it lately.
